Welcome to our practice! We'd like to thank you for selecting us as your orthodontic care team. Rest assured we'll make every effort to provide the highest quality treatment for your family. The goal of your first visit is to assess your orthodontic needs, inform you of the benefits of treatment, and to present financial options available to meet your needs.

We've scheduled your Initial Examination and at this appointment we'll conduct a preliminary examination of your current orthodontic condition. If a panoramic X-ray is needed for diagnosis, we will perform one during the appointment; the charge will be \$75. If it appears that orthodontic treatment is necessary, diagnostic records will be suggested. These records will help us to properly evaluate an orthodontic problem and plan a course of treatment.

Your examination visit will take approximately 45 minutes. If you would like to save yourself an extra visit, please set aside about 90 minutes for your exam and the diagnostic records we'll need to properly evaluate your treatment needs.

If you have any questions, please call 386-5800. We look forward to seeing you soon!

Warm Regards,

Rebecca French
Treatment Coordinator
